### ACADEMIC PROJECT DETAILS:

#### ➤ Meetup (Social Networking Site)

- Skills used: PHP, JavaScript, MySQL, CSS

The purpose of creating "Meetup" is now a days everyone are busy on his/her life nobody have time to spend with others. so we created a platform through which user can keep in touch

with old friends and he/she can make new friends & User can communicate with others through text message and he/she can share image, video & status through this Social Networking site.

➤ **Bus Information Live Monitoring System**

- Skills used: HTML, JavaScript, SQL, CSS, Java SE, Java EE

In olden days people have to go Bus stop to know bus details and they have to ask Bus details to the ticket counter in charge and there is a chance he may be there or may not be, maybe he knows the current location of the bus or may not be.

So we came along with an idea that is “Bus Information Live Monitoring System”. It is a complete application for User as well as Transportation Staff. Admin can provide information like available routes, timings, last stoppage details, etc. Users will have the facility to view all the bus details under transportation.

**ACHIEVEMENTS:**

- Selected as best attendance in my graduation First and Second Year.
- Class representative on Graduation & Post Graduation.
